DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 260, 261, 272, 273, 288, 298, 309, 310 and 320 is withdrawn in view of the new grounds of rejection as set forth below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 260, 261, 272, 273, 288, 298, 309, 310 and 320 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed "message" as defined by the tables or charts is partially readable from Figs. 10-10D and as such the disclosure is non-enabling as it is not clear how all the variables and other elements are defined within the message as constituted.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 260, 261, 272, 273, 288, 298, 309, 310 and 320 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear and adequately disclosed how the claimed "message" as represented by the tables is constituted. For example, it is not clear what constitutes the range of values for such header items as "Information Element", "Presence", "Multi", "IE Type and Reference", "Semantics Description", etc. Additionally, the items constituting the tables are not clearly defined and this makes the claims indefinite.
